DETAILED ACTION

Election/Restrictions

- 1) Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-48,53-62, drawn to multi-level document transformation, classified in class 715, subclass 514.
 - II. Claims 49-52, drawn to storage of documents in various forms, classified in class 715, subclass 513.
- 2) The inventions are distinct, each from the other because of the following reasons:

 Inventions I and II are related as subcombinations disclosed as usable together
 in a single combination. The subcombinations are distinct from each other if they are
 shown to be separately usable. In the instant case, invention (I) has separate utility
 such as customized document generation of multi-leveled transformations and invention
 (II) has separate utility such as generating customized documents by sequentially
 applying transforms, in the form of XSL style-sheets. See MPEP § 806.05(d).
- 3) Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4) Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
